

Lead Product Development for an Innovative Medical Device

Full Time

Are you an ambitious product developer with medical device development experience? Are you the best in keeping a good overview and do you easily connect with different kind of people? Do you want to work at a serious and ambitious MedTech Startup? Look no further and apply now!

Ivy Medical is looking for a Lead Product Development

Ivy Medical is developing a next generation medical device for infusion therapy. This device will reduce healthcare costs, help nurses and empower patients to move. Currently, we're working on our second functional model and planning to be market-ready in the beginning of 2023.

Job Description

As a Lead Product Development at Ivy Medical, you are responsible for the project management of our product development and for managing the cooperation with external parties, to develop an innovative product that consistently meets our quality standards. Your responsibilities:

- You are a crucial player in the Ivy Medical R&D team.
- You transfer the design from R&D to production establishment.
- You initiate and implement product design changes.
- You plan, perform, document and maintain risk management activities.
- You develop product documentation in compliance with regulatory requirements and internal quality management system.
- You manage technical documentation after development project completion.
- You support with CAPAs, non-conformities and complaints.
- You drive, coordinate and compile the Post Market Surveillance.
- You provide technical product expertise.

To be successful in this role

Qualifications:

- A PhD or Master's degree in (Bio)Medical Engineering, Mechanical, Electrical Engineering, Health Sciences or equivalent.
- 3 to 10 years of working experience in the medical device development industry.
- A background in a manufacturing, production or product development environment.
- Knowledge of medical device development (MDR) and quality control principles, relevant regulations and standards (e.g. ISO 13485).
- Highly proficient in spoken and written English and Dutch.

Competencies:

- Exceptional communication and planning skills.
- Leading and pro-active in product development management.
- Ability to prioritize tasks and clear explanation skills

In return, we offer you

We welcome you to a challenging, innovative environment with great opportunities for you to explore. In addition to working on a groundbreaking new product, you'll be working in a small, friendly and highly motivated team; all ideas are welcome and great work is rewarded. Moreover, we have a work hard /play hard approach and we believe in creating a fun, exciting work environment. Team lunches and outings are usual. The weekly stand-ups, great coffee and Friday afternoon drinks help too! We're also offering:

- Competitive market conform salary.
- Flexible holiday days.
- A culture of freedom & responsibility.
- Mobility budget / NS Business Card.
- Training programs.
- Creative and informal office vibe.
- Social activities like Friday afternoon drinks, summer BBQs and team outings.

Even More: Groningen!

You will be working in one of The Netherlands most innovative cities with a beautiful city centre. Providing a vibrant, creative and international environment, it is the largest city in the North.
